Concrete Penetrating Radar **20% DISCOUNT ON SCANNING & CORING**

CanWest has been in the scanning business for over two years now.

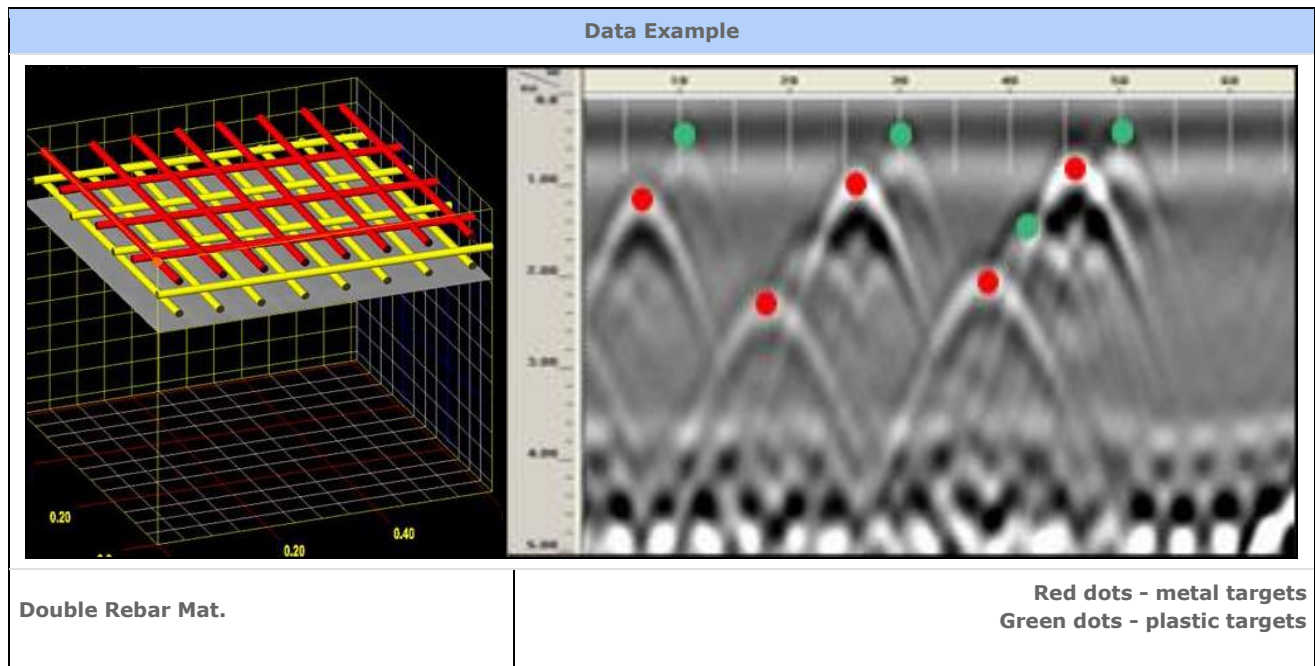

We are pleased to announce that for the winter months of November 2009 through March 2010 we will be offering a 20% discount on all scanning and coring. This discount will include:

- 2 Men, 1 Scanning Unit, Core Drilling, Core Catching, Removal of Cores Off-Site, and Vacuum Cleanup. Any additional work will be charged at regular rates.

In the last two years we have had a 98% success rate with our scanning, drilling & saw cutting, which in turn saved our clients thousands of dollars in expensive repair bills. Our scanner locates water lines, voids in concrete, in floor heating lines, power lines, computer lines, fibre optics, etc. Our new smaller scanning head gives greater definition in finding hard to see objects such as water pipes and voids in the concrete. We have also done several large scanning jobs on bridges to locate rebar before concrete milling.

We have references available for any type of scanning you may need.

CALL TODAY TO TAKE ADVANTAGE OF YOUR 20% DISCOUNT!!!!!!
